

INDEX TO VOLUME XXVI

INDEX OF SUBJECTS

Abscesses in the valve rings of the heart, a frequent and not well recognized complication of acute bacterial endocarditis. (<i>Sheldon and Golden</i> : July)	752*
Acromegaly—Local gigantism (a manifestation of neurofibromatosis): its relation to general gigantism and to . . . Illustrating the influence of intrinsic factors in disease when development of the body is abnormal. (<i>Inglis</i> : November)	1059
Acute non-streptococcal glomerulonephritis—experimental demonstration of a pathogenesis. (<i>Black-Schaffer and Silverman</i> : July)	696*
Addison's disease—Changes in the pancreatic islets of Langerhans in . . . (<i>Hinerman</i> : July)	738*
Adrenal cortical activity in relation to lymphoid tissue and to immune bodies. (<i>Stoerk and Solotorovsky</i> : July)	708*
Adrenal gland—Hormonally induced transformation of adrenal into myeloid tissue. (<i>Selye and Stone</i> : March)	211
—The effect of the hyperadrenal state on connective tissue. (<i>Platz, Howes, Meyer, Blunt, Lattes, and Ragan</i> : July)	709*
Adrenalin—Changes in the coronary and visceral arterioles of dogs following large doses of . . . (<i>Waters</i> : July)	697*
Ageing process—A study of the ageing of collagenous connective tissue of rat skin with the electron microscope. (<i>Gross</i> : July)	708*
Agglutinins—Adrenal cortical activity in relation to lymphoid tissue and to immune bodies. (<i>Stoerk and Solotorovsky</i> : July)	708*
Albright's syndrome—The pathology of the endocrine system in . . . (<i>MacMahon</i> : July)	747*
American Association of Pathologists and Bacteriologists—Proceedings of the . . . (July)	663
Amniotic fluid—The pathogenesis of . . . embolism. (<i>Landing and Leary</i> : July)	734*
Amyloid and myeloma. (<i>Dahlin and Dockerty</i> : July)	581
Anaphylaxis—The mechanism of the anaphylactoid phenomenon. (<i>Gross and Brown</i> : July)	724*
Anitschkow cells—Tissue mast cells with Anitschkow nuclei: investigations into cytologic bases of rheumatic processes. (<i>Hamilton and Syverton</i> : July)	705*
Anomalies of the coronary arteries. Report of two cases, with a comment on the dynamics of development of the coronary circulation. (<i>Dutra</i> : July)	742*
Antibody—Structural changes produced in Brown-Pearce carcinoma cells by means of a specific . . . (<i>Kalfayan and Kidd</i> : July)	745*
Antigen—Intracellular reaction to particulate . . . (<i>Hopps</i> : July)	693*
Anti-stiffness factor—Pathologic changes induced in guinea-pigs by administration of diets deficient in the . . . (<i>Harris and Wulsen</i> : July)	595
Appendiceal arteritis. (<i>Weinberg</i> : July)	754*
Appendix—Periarteritis nodosa of the . . . (<i>Platt</i> : July)	749*
Aqueduct of Sylvius—Developmental stenosis of the . . . (<i>Beckett, Netsky, and Zimmerman</i> : September)	755
Arterioles—Changes in the coronary and visceral . . . of dogs following large doses of adrenalin. (<i>Waters</i> : July)	697*
Arteriosclerosis—Pulmonary . . . (<i>Laipply and Fisher</i> : July)	731*
—Studies of the pathogenesis of human . . . and experimental . . . in the pyridoxine-deficient monkey. (<i>Rinehart and Greenberg</i> : July)	689*
—The interrelation of elastic tissue and calcium in the genesis of . . . (<i>Blumenthal, Lansing, and Gray</i> : November)	989

* Abstract of paper presented at the meeting of The American Association of Pathologists and Bacteriologists held at Madison, April 13, 14, and 15, 1950.

Arteritis—Appendiceal (Weinberg: July)	754*
— Asymptomatic focal . . . ; 88 cases. (Plaut: July)	699*
— Bilateral mammary Report of a case. (Waugh: September)	851
— Necrotizing pulmonary . . . occurring with congenital heart disease (Eisenmenger complex): report of case with necropsy. (Old and Russell: September)	789
— Studies on the pathogenesis of necrotizing (Holman: July)	700*
Ascorbic acid—Effect of . . . deficiency on the collagen content of guinea-pig tissues. (Elster: July)	711*
Association of lymphocytes with cancer cells undergoing distinctive necrobiosis in resistant and immune hosts. (Kidd and Toolan: July)	672*
Asteroids—Tissue reactions associated with radial inclusions in giant cells. (Cunningham: July)	668*
Asymptomatic focal arteritis; 88 cases. (Plaut: July)	699*
Atherosclerosis—Serum phospholipids in experimental (Kellner: July)	732*
— The influence of coronary . . . and myocardial hypertrophy on the flow-capacity of the coronary circulation as determined post mortem. (Robertson: July)	731*
Benign lymphoma of rectum. (Heller and Lewis: May)	463
Beryllium—Osteosarcoma induced by . . . oxide. (Dutra and Largent: March)	197
Bilateral mammary arteritis. Report of a case. (Waugh: September)	851
Blood—The "lupus erythematosus phenomena" of . . . and bone marrow. Morphologic and serologic observations. (Berman, Axelrod, Goodman, and McClaughry: July)	740*
Blood factor in acute disseminated lupus erythematosus. (Haserick: July)	704*
Blood vessels—Disseminated arteriolar and capillary platelet thrombosis. A morphologic study of its histogenesis. (Gore: January)	155
Bone—Amyloid and myeloma. (Dahlin and Dockerty: July)	581
— The demonstration of an effect of parathyroid extract on . . . matrix. (Carnes: July)	736*
— The effect of the calcium and phosphorus content of the diet upon the formation and structure of (Carttar, McLean, and Urist: March)	307
Bone marrow—The "lupus erythematosus phenomena" of blood and Morphologic and serologic observations. (Berman, Axelrod, Goodman, and McClaughry: July)	740*
Brain—Developmental stenosis of the aqueduct of Sylvius. (Beckett, Netsky, and Zimmerman: September)	755
— Experimental observations on the relation of increased intracranial pressure and pulmonary edema. (Harrison and Liebow: July)	745*
— Histopathologic patterns of . . . damage in erythroblastosis of the newborn. (Terplan and Barnes: July)	722*
Breast—Bilateral mammary arteritis. Report of a case. (Waugh: September)	851
— Nuclear structure in mammary carcinoma. (Black and Speer: September)	913
— Sarcomatoid growths resulting from mammary carcinoma cells that had sojourned in immune mice. (Toolan and Kidd: July)	753*
Bronchial arteries—Studies on the lung after ligation of the pulmonary artery. II. Anatomical changes. (Liebow, Hales, Bloomer, Harrison, and Lindskog: March)	177
Calcinosis—Experimental . . . on a nutritional basis. (Szanto, Nelson, Weinmann, Ivy, and Popper: July)	752*
— Metastasizing carcinoma of the parathyroid with osteitis fibrosa cystica and extensive (Ellis and Lee: July)	742*

- Calcium**—The effect of the . . . and phosphorus content of the diet upon the formation and structure of bone. (*Cartlar, McLean, and Urist*: March) 307
- The interrelation of elastic tissue and . . . in the genesis of arteriosclerosis. (*Blumenthal, Lansing, and Gray*: November) 989
- Cancer**—Further observations on color reactions with sera of patients with malignant neoplasms. (*Weiss*: July) 754*
- Sponge biopsy in the diagnosis of rectal and sigmoidal . . . (*Gladstone*: July) 744*
- Carbohydrate specificity of the periodic acid-Schiff's reagent (PAS) method.** (*McManus*: July) 690*
- Carbon tetrachloride**—Histochemical and microchemical study of mouse liver following a single feeding of . . . (*Stowell, Lee, and Tsuboi*: July) 687*
- The pathology of fatal . . . poisoning. With special reference to the histogenesis of the hepatic and renal lesions. (*Moon*: November) 1041
- Carcinoma**—Nuclear structure in mammary . . . (*Black and Speer*: September) 913
- Sarcomatoid growths resulting from mammary . . . cells that had sojourned in immune mice. (*Toolan and Kidd*: July) 753*
- Carcinoma cells**—Structural changes produced in Brown-Pearce . . . by means of a specific antibody. (*Kalfayan and Kidd*: July) 745*
- Carcinoma of the pancreas.** A clinical and pathologic analysis of thirty-nine autopsied cases. (*Leach*: March) 333
- Cell type of secondary parathyroid hyperplasia.** (*Brines and Frits*: July) 737*
- Centrilobular hepatic necrosis following cardiac infarction.** (*Clarke*: March) 249
- Cervix uteri**—Further studies on the histogenesis of intra-epithelial carcinoma and early invasive carcinoma of the . . . (*Stoddard, Erickson, and Howard*: July) 679*
- Changes in the coronary and visceral arterioles of dogs following large doses of adrenalin.** (*Waters*: July) 697*
- Changes in the pancreatic islets of Langerhans in Addison's disease.** (*Hinerman*: July) 738*
- Chemodectoma in the dog.** (*Mulligan*: July) 680*
- Chicken**—Lymphoid tissue and its relation to so-called normal lymphoid foci and to lymphomatosis. II. Quantitative analysis of lymphoid areas in the pancreas of laboratory and farm chickens. (*Lucas and Oakberg*: January) 75
- Choline**—The importance of methionine and . . . in the arrest of dietary cirrhosis of the liver in the rat. (*Jaffé, Wissler, and Benditt*: September) 951
- Chromaffin tumors**—Pheochromocytomas and their relation to other . . . (*Wahl*: July) 678*
- Chronic pancreatitis and lithiasis.** II. Pathology and pathogenesis of pancreatic lithiasis. (*Edmondson, Bullock, and Mehl*: January) 37
- Chronic "peptic" ulcer:** possibility of differences in pathogenesis. (*Cox*: July) 721*
- Cirrhosis**—See Liver.
- Clinicopathologic study of cardiac cirrhosis.** (*Kotin and Hall*: July) 718*
- Coagulase-globulin**—The relationship of . . . to prothrombin as studied by the staphylocoagulase reaction. (*Miale*: July) 747*
- Colitis**—Liver damage in ulcerative . . . (*Kimmelstiel, Large, and Verner*: July) 715*
- Collagen**—Effect of ascorbic acid deficiency on the . . . content of guinea-pig tissues. (*Elster*: July) 711*
- Collagen diseases**—A summary for the defense of the altered immunity mechanism in the . . . (*Aegerter and Long*: July) 702*
- Electron microscopic studies of collagen from normal and diseased tissues. (*Gale*: July) 707*

- The concept of (Klemperer: July, 712*; July) 505
- The effect of the hyperadrenal state on connective tissue. (Plotz, Howes, Meyer, Blunt, Lattes, and Ragan: July) 709*
- The relation of the lesions of hypersensitivity to the (More: July) 702*
- Color reactions—Further observations on . . . with sera of patients with malignant neoplasms. (Weiss: July) 754*
- Combined histochemical staining of acid polysaccharides and 1,2 glycol groupings in paraffin sections of rat tissues. (Ritter and Oleson: July) 639
- Comparative morphogenesis of extragenital and gonadal teratoid tumors. (Friedman: July) 676*
- Comparison of cutaneous and pulmonary lesions in experimental silicosis. (Anderson and Gunn: July) 735*
- Concept of collagen diseases. (Klemperer: July, 712*; July) 505
- Connective tissue—Reactive abnormalities in . . . of the lung. (Altshuler and Angevine: July) 683*
- Correlation between biopsy findings in liver cirrhosis and clinical and laboratory features. (Popper, Waldstein, and Szanto: July) 716*
- Cortisone—The effect of . . . on the formation of granulation tissue in mice. (Spain, Molomui, and Haber: July) 710*
- The effect of . . . on the lesions of periarteritis nodosa. (Baggenstoss, Shick, and Polley: July) 709*
- Cystinosis: a report of two cases with post-mortem examination. (Clarke and Jackson: July) 726*
- Cytologic technic—An evaluation of the . . . in the recognition of malignant uterine neoplasms. (Reagan and Schmidt: July) 750*
- Morphologic criteria of exfoliated malignant cells. (Rosenthal: July) 751*

- Death in infancy—Morphologic evidence of vascular injury as a possible mechanism of sudden death during infancy. (Werne and Garrow: July) 730*
- Dehydrogenase—Visualization of . . . activity in tissues. (Black, Speer, and Opler: July) 741*
- Demonstration of an effect of parathyroid extract on bone matrix. (Carnes: July) 736*
- Dermatomycoses—The general pathology of the (Baker: July) 719*
- Desoxycorticosterone—Tissue changes induced by . . . acetate (DCA) in the guinea-pig, with particular regard to connective tissue. (Pirani and Stepto: July) 749*
- Developmental disturbances—Intra-uterine respiration-like movements in relation to development of the fetal vascular system. A discussion of intra-uterine physiology based upon cases of congenital absence of the trachea, abnormal vascular development, and other anomalies. (Milles and Dorsey: May) 411
- Necrotizing pulmonary arteritis occurring with congenital heart disease (Eisenmenger complex): report of case with necropsy. (Old and Russell: September) 789
- The etiology of lateral nasal clefts. (Stupka: November) 1085
- Developmental stenosis of the aqueduct of Sylvius. (Beckell, Nelsky, and Zimmerman: September) 755
- Diabetes mellitus—Glycogen infiltration (so-called "hydropic degeneration") of the pancreas in experimental and human (Toreson: July) 739*
- Dietary factors—Experimental . . . on a nutritional basis. (Szanto, Nelson, Weinmann, Ivy, and Popper: July) 752*
- Hepatic necrosis induced by dietary means. (Abell and Beveridge: July) 713*

- Pathologic changes induced in guinea-pigs by administration of diets deficient in the anti-stiffness factor. (*Harris and Wulzen*: July) 595
- Skeletal growth and articular changes in mice receiving a high-fat diet. (*Silberberg and Silberberg*: January) 113
- The effect of the calcium and phosphorus content of the diet upon the formation and structure of bone. (*Carlitar, McLean, and Urist*: March) 307
- Diffuse glomerulonephritis induced in rabbits by repeated small intravenous injections of whole horse serum. (*McLean, Fitzgerald, Younghusband, and Hamilton*: July) 694*
- Disseminated arteriolar and capillary platelet thrombosis. A morphologic study of its histogenesis. (*Gore*: January) 155
- Distinctive vacuolar nephropathy associated with intestinal disease. (*Kulka, Pearson, and Robbins*: May) 349
- Dog—Changes in the coronary and visceral arterioles of dogs following large doses of adrenalin. (*Waters*: July) 697*
- Chemodectoma in the (*Mulligan*: July) 680*
- The pathology and etiology of salmon disease in the . . . and fox. (*Cordy and Gorham*: July) 617
- Edema—Experimental observations on the relation of increased intracranial pressure and pulmonary (*Harrison and Liebow*: July) 745*
- Effect of ascorbic acid deficiency on the collagen content of guinea-pig tissues. (*Elster*: July) 711*
- Effect of cortisone on the formation of granulation tissue in mice. (*Spain, Molomut, and Haber*: July) 710*
- Effect of cortisone on the lesions of periarteritis nodosa. (*Baggenstoss, Shick, and Polley*: July) 709*
- Effect of hepbisul (heptyl aldehyde-sodium bisulfite addition compound) and thyroxin on Walker rat carcinoma 256. (*Kraemer, Herbut, and Jackson*: July) 674*
- Effect of Hodgkin's disease extracts on fertile chicken eggs. (*Bostick*: July) 675*
- Effect of renal ischemia on the production of experimental nephrosis in jaundiced rabbits. (*Wartman, Rusterholz, and Tucker*: March) 235
- Effect of restriction of fluid intake on the production of nephrosis in rabbits. (*Wartman, Tucker, and Jennings*: May) 389
- Effect of sensitization and x-radiation on the metabolism of I¹³¹-labeled proteins. (*Dammin, Dixon, and Bukantz*: July) 691*
- Effect of sodium sulfadiazine on the renal tubule (nephron) of the albino rat. (*Brunson and Edwards*: September) 923
- Effect of the calcium and phosphorus content of the diet upon the formation and structure of bone. (*Carlitar, McLean, and Urist*: March) 307
- Effect of the hyperadrenal state on connective tissue. (*Plotz, Howes, Meyer, Blunt, Lattes, and Ragan*: July) 709*
- Effects of pregnancy and age upon resistance to viral infection. (*Pearce*: July) 669*
- Eisenmenger complex—Necrotizing pulmonary arteritis occurring with congenital heart disease (. . .): report of case with necropsy. (*Old and Russell*: September) 789
- Elastic tissue—The interrelation of . . . and calcium in the genesis of arteriosclerosis. (*Blumenthal, Lansing, and Gray*: November) 989
- Electron microscope—A fibrous component of the nerve axon demonstrated in thin sections with the (*Geren*: July) 723*
- A study of the ageing of collagenous connective tissue of rat skin with the (*Gross*: July) 708*
- Electron microscopic studies of collagen from normal and diseased tissues. (*Gale*: July) 707*

- Embolism**—The pathogenesis of amniotic fluid (*Landing and Leary*: July) 734*
- The pathogenesis of experimental fat (*Harman and Ragaz*: July) 551
- Encephalitis**—Inclusion With a clinicopathologic report of three cases. (*Malamud, Haymaker, and Pinkerton*: January) 133
- Encephalomyelitis**—A lipolytic enzyme in reactive histiocytes of guinea-pigs with experimental (*Vogel*: July) 670*
- Endocardial fibro-elastosis**: a study of eight cases. (*Prior, Ferguson, and Wyatt*: July) 728*
- a study of eight cases. (*Prior and Wyatt*: November) 969
- Endocarditis**—Abscesses in the valve rings of the heart, a frequent and not well recognized complication of acute bacterial (*Sheldon and Golden*: July) 752*
- Endophlebohypertrophy and phlebosclerosis**. (*Lev and Saphir*: July) 727*
- Enzymes**—Histochemical studies on tissue IV. Distribution of some enzyme systems which liberate phosphate at pH 9.2 as determined with various substrates and inhibitors; demonstration of three groups of (*Newman, Feigin, Wolf, and Kabat*: March) 257
- Histochemical studies on tissue V. A difficulty in enzyme localization in the acid range due to selective affinity of certain tissues for lead; its dependence on pH. (*Newman, Kabat, and Wolf*: May) 489
- Histochemical studies on tissue VI. A difficulty in the histochemical localization of alkaline phosphatase in nuclei. (*Feigin, Wolf, and Kabat*: July) 647
- The structure of mitochondria and its relation to the cyclophorase system of integrated (*Harman*: July) 687*
- Eosinophilic meningitis**: two case reports. (*Ferguson, McVay, and Hill*: July) 725*
- Erythroblastosis**—Histopathologic patterns of brain damage in . . . of the newborn. (*Terplan and Barnes*: July) 722*
- Etiology of lateral nasal clefts**. (*Stupka*: November) 1085
- Etiology of pulmonary granulomas**: a bacteriologic and histopathologic study of surgically resected specimens. (*Weed and Woolner*: July) 681*
- Evaluation of the cytologic technic in the recognition of malignant uterine neoplasms**. (*Reagan and Schmidt*: July) 750*
- Exfoliative cytology in pulmonary tuberculosis**. (*Chipps, Krauel, and Lippincott*: July) 685*
- Experimental calcinosis on a nutritional basis**. (*Szanto, Nelson, Weinmann, Ivy, and Popper*: July) 752*
- Experimental observations on the relation of increased intracranial pressure and pulmonary edema**. (*Harrison and Liebow*: July) 745*
- Experimental total midzonal hepatic necrosis**. (*Black-Schaffer, Johnson, and Gobbel*: May) 397
- Factors affecting the number of tumor metastases**. Experiments with a transplantable mouse tumor. (*McCutcheon, Zeidman, and Coman*: July) 673*
- Fatal inclusion disease in newborn infants**. (*Vellios and Smith*: July) 667*
- Fat embolism**—The pathogenesis of experimental (*Harman and Ragaz*: July) 551
- Fate of transfused plasma protein**, studied with plasma labeled with radioactive sulfur. (*Zeldis and Madden*: July) 726*
- Fetus**—Intra-uterine respiration-like movements in relation to development of the fetal vascular system. A discussion of intra-uterine physiology based upon cases of congenital absence of the trachea, abnormal vascular development, and other anomalies. (*Milles and Dorsey*: May) 411
- Fibro-elastosis**—Endocardial . . . : a study of eight cases. (*Prior, Ferguson, and Wyatt*: July) 728*

- Endocardial . . . : a study of eight cases. (*Prior and Wyatt:*
November) 969
- Fibromatosis**—The effects of pregnancy and age upon resistance to
viral infection. (*Pearce:* July) 669*
- Fibrosarcoma**—The tissue origin of neoplasms. Studies on the early
phases of induced . . . in the hamster. (*Nettleship:* July) 748*
- Fibrous component of the nerve axon** demonstrated in thin sections with
the electron microscope. (*Geren:* July) 723*
- Folic acid**—The morphologic and bioassay changes in Rous sarcoma
associated with dietary or antagonist-induced . . . deficiency.
(*Woll, Dornbush, and Little:* July) 671*
- The pathology of . . . antagonists in mice. (*Diamond and Farber:*
July) 671*
- Foreign body reaction**—Giant cell . . . to non-cholesterol lipid plate
crystals. A case report with chemical studies. (*Engle:* July) 743*
- Formazan**—Observations on the reduction of triphenyl tetrazolium
chloride by normal and malignant human tissue. (*Black, Opler,*
and Speer: November) 1097
- Fox**—The pathology and etiology of salmon disease in the dog and . . .
(*Cordy and Gorham:* July) 617
- Further observations on color reactions with sera of patients with**
malignant neoplasms. (*Weiss:* July) 754*
- Further studies on the histogenesis of intra-epithelial carcinoma and**
early invasive carcinoma of the cervix uteri. (*Stoddard, Erickson,*
and Howard: July) 679*

- Generalized cytomegalic inclusion disease.** (*Wyatt:* July) 668*
- General pathology of the dermatomycoses.** (*Baker:* July) 719*
- Germinoma**—The comparative morphogenesis of extragenital and
gonadal teratoid tumors. (*Friedman:* July) 676*
- Giant cell foreign body reaction to non-cholesterol lipid plate crystals.**
A case report with chemical studies. (*Engle:* July) 743*
- Gigantism**—Local . . . (a manifestation of neurofibromatosis): its re-
lation to general . . . and to acromegaly. Illustrating the influence
of intrinsic factors in disease when development of the body is
abnormal. (*Inglis:* November) 1059
- Glomerulonephritis**—Acute non-streptococcal . . .—experimental dem-
onstration of a pathogenesis. (*Black-Schaffer and Silverman:* July) 696*
- Unusual . . . in young children, probably radiation nephritis. Re-
port of three cases. (*Zuelzer, Palmer, and Newton:* November) 1019
- Glycogen infiltration (so-called "hydropic degeneration") of the pan-**
creas in experimental and human diabetes mellitus. (*Toreson:*
July) 739*
- Glycol groupings**—Combined histochemical staining of acid polysac-
charides and 1,2 . . . in paraffin sections of rat tissues. (*Ritter and*
Oleson: July) 639
- Glycoproteins in human pathologic thyroid glands.** (*Milles and Gersh:*
July) 704*
- Goiter**—Structure and iodine content of thyrotoxic goiters in Iceland.
(*Sigurjonsson:* November) 1103
- Goldfish**—Neurofibromatosis in . . . resembling von Recklinghausen's
disease in man. (*Schlumberger:* July) 679*
- Granuloma**—Starch and starch granulomata. (*Hall:* July) 683*
- The etiology of pulmonary granulomas: a bacteriologic and histo-
pathologic study of surgically resected specimens. (*Weed and*
Woolner: July) 681*
- Guinea-pig**—A lipolytic enzyme in reactive histiocytes of guinea-pigs
with experimental encephalomyelitis. (*Vogel:* July) 670*
- Effect of ascorbic acid deficiency on the collagen content of . . .
tissues. (*Elster:* July) 711*

- Pathologic changes induced in guinea-pigs by administration of diets deficient in the anti-stiffness factor. (*Harris and Wulzen*: July) 595
- Tissue changes induced by desoxycorticosterone acetate (DCA) in the . . . , with particular regard to connective tissue. (*Pirani and Stepto*: July) 749*
- Hamster**—The tissue origin of neoplasms. Studies on the early phases of induced fibrosarcoma in the . . . (*Nettleship*: July) 748*
- Heart**—Abscesses in the valve rings of the . . . , a frequent and not well recognized complication of acute bacterial endocarditis. (*Sheldon and Golden*: July) 752*
- Anomalies of the coronary arteries. Report of two cases, with a comment on the dynamics of development of the coronary circulation. (*Dutra*: July) 742*
- Centrilobular hepatic necrosis following cardiac infarction. (*Clarke*: March) 249
- Clinicopathologic study of cardiac cirrhosis. (*Kotin and Hall*: July) 718*
- Endocardial fibro-elastosis: a study of eight cases. (*Prior, Ferguson, and Wyatt*: July) 728*
- Endocardial fibro-elastosis: a study of eight cases. (*Prior and Wyatt*: November) 969
- Lesions of the . . . in rabbits intravenously injected with serums from cases of rheumatic fever. (*Schultz and File*: July) 706*
- Necrotizing pulmonary arteritis occurring with congenital . . . disease (Eisenmenger complex): report of case with necropsy. (*Old and Russell*: September) 789
- The influence of coronary atherosclerosis and myocardial hypertrophy on the flow-capacity of the coronary circulation as determined post mortem. (*Robertson*: July) 731*
- Hepatic necrosis induced by dietary means.** (*Abell and Beveridge*: July) 713*
- Hepbisul**—The effect of . . . (heptyl aldehyde-sodium bisulfite addition compound) and thyroxin on Walker rat carcinoma 256. (*Kraemer, Herbut, and Jackson*: July) 674*
- Histochemical and microchemical study of mouse liver following a single feeding of carbon tetrachloride.** (*Stowell, Lee, and Tsuboi*: July) 687*
- Histochemical studies on tissue enzymes.** IV. Distribution of some enzyme systems which liberate phosphate at pH 9.2 as determined with various substrates and inhibitors; demonstration of three groups of enzymes. (*Newman, Feigin, Wolf, and Kabat*: March) 257
- V. A difficulty in enzyme localization in the acid range due to selective affinity of certain tissues for lead; its dependence on pH. (*Newman, Kabat, and Wolf*: May) 489
- VI. A difficulty in the histochemical localization of alkaline phosphatase in nuclei. (*Feigin, Wolf, and Kabat*: July) 647
- Histogenesis of papillary cystadenoma lymphomatosum** (Warthin's tumor) of the parotid salivary gland. (*Thompson and Bryant*: September) 807
- Histologic study of muscles and nerves in poliomyelitis.** (*Dunst and Neuburger*: September) 863
- Histopathologic patterns of brain damage in erythroblastosis of the newborn.** (*Terplan and Barnes*: July) 722*
- Hodgkin's disease**—The effect of . . . extracts on fertile chicken eggs. (*Bostick*: July) 675*
- Hormonally induced transformation of adrenal into myeloid tissue.** (*Selye and Stone*: March) 211
- Horse serum**—Diffuse glomerulonephritis induced in rabbits by repeated small intravenous injections of whole . . . (*McLean, Fitzgerald, Younghusband, and Hamilton*: July) 694*

- Hyperglobulinemia**—Plasmacytosis observed post mortem in cases exhibiting . . . or signs of hypersensitivity. (*Robertson*: July) . . . 750*
- Hypersensitivity**—A summary for the defense of the altered immunity mechanism in the collagen diseases. (*Aegerter and Long*: July) . . . 702*
- Local cellular responses in experimental . . . (*Angevine and Seastone*: November) . . . 1011
- The relation of the lesions of . . . to the collagen diseases. (*More*: July) . . . 702*
- Hypertension in rats following complete renal ischemia.** (*Koletsky*: July) . . . 695*
- Icterus**—The effect of renal ischemia on the production of experimental nephrosis in jaundiced rabbits. (*Wartman, Rusterholz, and Tucker*: March) . . . 235
- Importance of methionine and choline in the arrest of dietary cirrhosis of the liver in the rat.** (*Jaffé, Wissler, and Benditt*: September) . . . 951
- Incidence of subclinical poliomyelitis in an urban area, according to age groups.** (*Casey, Fishbein, Schabel, and Smith*: July) . . . 741*
- Inclusion bodies**—Fatal inclusion disease in newborn infants. (*Vellios and Smith*: July) . . . 667*
- Generalized cytomegalic inclusion disease. (*Wyatt*: July) . . . 668*
- Inclusion encephalitis. With a clinicopathologic report of three cases. (*Malamud, Haymaker, and Pinkerton*: January) . . . 133
- New features of inclusion disease of infancy. (*Worth and Howard*: January) . . . 17
- Tissue reactions associated with radial inclusions in giant cells. (*Cunningham*: July) . . . 668*
- Inclusion disease**—Fatal . . . in newborn infants. (*Vellios and Smith*: July) . . . 667*
- Generalized cytomegalic . . . (*Wyatt*: July) . . . 668*
- New features of . . . of infancy. (*Worth and Howard*: January) . . . 17
- Inclusion encephalitis.** With a clinicopathologic report of three cases. (*Malamud, Haymaker, and Pinkerton*: January) . . . 133
- Infarction**—Centrilobular hepatic necrosis following cardiac . . . (*Clarke*: March) . . . 249
- Infarction of the prostate.** (*Mostofi and Morse*: July) . . . 720*
- Inflammatory pseudotumors of the pleura.** (*Brown and Johnson*: July) . . . 681*
- Influence of coronary atherosclerosis and myocardial hypertrophy on the flow-capacity of the coronary circulation as determined post mortem.** (*Robertson*: July) . . . 731*
- Interrelation of elastic tissue and calcium in the genesis of arteriosclerosis.** (*Blumenthal, Lansing, and Gray*: November) . . . 989
- Intracellular reaction to particulate antigen.** (*Hopps*: July) . . . 693*
- Intra-epithelial carcinoma**—Further studies on the histogenesis of . . . and early invasive carcinoma of the cervix uteri. (*Stoddard, Erickson, and Howard*: July) . . . 679*
- Intra-uterine respiration-like movements** in relation to development of the fetal vascular system. A discussion of intra-uterine physiology based upon cases of congenital absence of the trachea, abnormal vascular development, and other anomalies. (*Milles and Dorsey*: May) . . . 411
- Intrinsic factors**—Neurilemmoblastosis. The influence of . . . in disease when development of the body is abnormal. (*Inglis*: July) . . . 521
- Iodine¹³¹**—The effect of sensitization and x-radiation on the metabolism of I¹³¹-labeled proteins. (*Dammin, Dixon, and Bukantz*: July) . . . 691*
- Iron**—The relationship of the pancreas to the absorption of . . . (*Kinney, Finch, Kaufman, Hegsted, and Partington*: July) . . . 746*
- Irradiation**—The reaction of reticulo-endothelial cells of rabbits to total body x-radiation. (*Barrow, Tullis, and Chambers*: July) . . . 686*

- Unusual glomerulonephritis in young children, probably . . . nephritis. Report of three cases. (*Zuelzer, Palmer, and Newton*: November) . . . 1019
- Ischemia**—Hypertension in rats following complete renal . . . (*Kolets- sky*: July) . . . 695*
- Isolation and analysis of tissue structure by physiochemical methods.** (*Hass*: July) . . . 701*
- Kidney**—A distinctive vacuolar nephropathy associated with intestinal disease. (*Kulka, Pearson, and Robbins*: May) . . . 349
- Hypertension in rats following complete renal ischemia. (*Kolets- sky*: July) . . . 695*
- Parenchymatous lesions of liver and . . . of mice due to pectin. (*Richter*: May) . . . 379
- Renal siderosis in hemoglobinuric nephropathy. (*O'Donnell*: Sep- tember) . . . 899
- The effect of renal ischemia on the production of experimental nephrosis in jaundiced rabbits. (*Wartman, Rusterholz, and Tucker*: March) . . . 235
- The effect of restriction of fluid intake on the production of nephrosis in rabbits. (*Wartman, Tucker, and Jennings*: May) . . . 389
- The effect of sodium sulfadiazine on the renal tubule (nephron) of the albino rat. (*Brunson and Edwards*: September) . . . 923
- The pathology of fatal carbon tetrachloride poisoning. With special reference to the histogenesis of the hepatic and renal lesions. (*Moon*: November) . . . 1041
- Lead**—Histochemical studies on tissue enzymes. V. A difficulty in enzyme localization in the acid range due to selective affinity of certain tissues for . . . ; its dependence on pH. (*Newman, Kabat, and Wolf*: May) . . . 489
- Lesions of the heart in rabbits intravenously injected with serum from cases of rheumatic fever.** (*Schultz and Fite*: July) . . . 706*
- Lipid crystals**—Giant cell foreign body reaction to non-cholesterol lipid plate crystals. A case report with chemical studies. (*Engle*: July) . . . 743*
- Lipolytic enzyme in reactive histiocytes of guinea-pigs with experimental encephalomyelitis.** (*Vogel*: July) . . . 670*
- Lithiasis**—Chronic pancreatitis and . . . II. Pathology and patho- genesis of pancreatic . . . (*Edmondson, Bullock, and Mehl*: January) . . . 37
- Liver**—Centrilobular hepatic necrosis following cardiac infarction. (*Clarke*: March) . . . 249
- Clinicopathologic study of cardiac cirrhosis. (*Kotin and Hall*: July) . . . 718*
- Correlation between biopsy findings in . . . cirrhosis and clinical and laboratory features. (*Popper, Waldstein, and Szanto*: July) . . . 716*
- Experimental total midzonal hepatic necrosis. (*Black-Schaffer, Johnson, and Gobel*: May) . . . 397
- Hepatic necrosis induced by dietary means. (*Abell and Beveridge*: July) . . . 713*
- Histochemical and microchemical study of mouse . . . following a single feeding of carbon tetrachloride. (*Stowell, Lee, and Tsuboi*: July) . . . 687*
- Observations on the mitotic reaction induced by thiourea in the livers of rats. (*Rachmilewitz, Rosin, and Doljanski*: September) . . . 937
- Parenchymatous lesions of . . . and kidney of mice due to pectin. (*Richter*: May) . . . 379
- Peliosis hepatis. (*Zak*: January) . . . I
- The importance of methionine and choline in the arrest of dietary cirrhosis of the . . . in the rat. (*Jaffé, Wissler, and Benditt*: Sep- tember) . . . 951

- The pathology of fatal carbon tetrachloride poisoning, with special reference to the histogenesis of the hepatic and renal lesions. (*Moon: November*) 1041
- Liver damage in ulcerative colitis.** (*Kimmelstiel, Large, and Verner: July*) 715*
- Local cellular responses in experimental hypersensitivity.** (*Angevine and Seastone: November*) 1011
- Local gigantism** (a manifestation of neurofibromatosis): its relation to general gigantism and to acromegaly. Illustrating the influence of intrinsic factors in disease when development of the body is abnormal. (*Inglis: November*) 1059
- Lung**—A comparison of cutaneous and pulmonary lesions in experimental silicosis. (*Anderson and Gunn: July*) 735*
- Exfoliative cytology in pulmonary tuberculosis. (*Chipps, Krauel, and Lippincott: July*) 685*
- Experimental observations on the relation of increased intracranial pressure and pulmonary edema. (*Harrison and Liebow: July*) 745*
- Necrotizing pulmonary arteritis occurring with congenital heart disease (Eisenmenger complex): report of case with necropsy. (*Old and Russell: September*) 789
- Observations on arteriovenous communications ("hemangioma") in the . . . (*Liebow, Kausel, Lindskog, and Janzen: July*) 730*
- Reactive abnormalities in connective tissue of the . . . (*Allshuler and Angevine: July*) 683*
- Studies on the . . . after ligation of the pulmonary artery. II. Anatomical changes. (*Liebow, Hales, Bloomer, Harrison, and Lindskog: March*) 177
- The etiology of pulmonary granulomas: a bacteriologic and histopathologic study of surgically resected specimens. (*Weed and Woolner: July*) 681*
- Lupus erythematosus**—Blood factor in acute disseminated . . . (*Haserick: July*) 704*
- The "... phenomena" of blood and bone marrow. Morphologic and serologic observations. (*Berman, Axelrod, Goodman, and McClaughry: July*) 740*
- "Lupus erythematosus phenomena" of blood and bone marrow.** Morphologic and serologic observations. (*Berman, Axelrod, Goodman, and McClaughry: July*) 740*
- Lymphocytes**—The association of . . . with cancer cells undergoing distinctive necrobiosis in resistant and immune hosts. (*Kidd and Toolan: July*) 672*
- Lymphoid lesions in poliomyelitis.** (*Hartman, Sommers, and Wilson: July*) 667*
- Lymphoid tissue**—Adrenal cortical activity in relation to . . . and to immune bodies. (*Stoerk and Solotorovsky: July*) 708*
- Lymphoid tissue and its relation to so-called normal lymphoid foci and to lymphomatosis.** II. Quantitative analysis of lymphoid areas in the pancreas of laboratory and farm chickens. (*Lucas and Oakberg: January*) 75
- Lymphoma**—Benign . . . of rectum. (*Heller and Lewis: May*) 463
- Lymphomatosis**—Lymphoid tissue and its relation to so-called normal lymphoid foci and to . . . II. Quantitative analysis of lymphoid areas in the pancreas of laboratory and farm chickens. (*Lucas and Oakberg: January*) 75
- Mast cells**—Tissue . . . with Anitschkow nuclei: investigations into cytologic bases of rheumatic processes. (*Hamilton and Syverton: July*) 705*
- Mechanism of the anaphylactoid phenomenon.** (*Gross and Brown: July*) 724*
- Meningitis**—Eosinophilic . . . : two case reports. (*Ferguson, McVay, and Hill: July*) 725*

- Mesothelioma**—Pleural . . . (*Campbell*: May) . . . 473
- Metastasis**—Factors affecting the number of tumor metastases. Experiments with a transplantable mouse tumor. (*McCutcheon, Zeidman, and Coman*: July) . . . 673*
- Metastasizing carcinoma of the parathyroid** with osteitis fibrosa cystica and extensive calcinosis. (*Ellis and Lee*: July) . . . 742*
- Methionine**—The importance of . . . and choline in the arrest of dietary cirrhosis of the liver in the rat. (*Jaffé, Wissler, and Benditt*: September) . . . 951
- Mitochondria**—The structure of . . . and its relation to the cyclophorase system of integrated enzymes. (*Harman*: July) . . . 687*
- Mitosis**—Observations on the mitotic reaction induced by thiourea in the livers of rats. (*Rachmilewits, Rosin, and Doljanski*: September) . . . 937
- Monkey**—Studies of the pathogenesis of human arteriosclerosis and experimental arteriosclerosis in the pyridoxine-deficient . . . *Rinehart and Greenberg*: July) . . . 689*
- Morphologic and bioassay changes in Rous sarcoma** associated with dietary or antagonist-induced folic acid deficiency. (*Woll, Dornbush, and Little*: July) . . . 671*
- Morphologic criteria of exfoliated malignant cells**. (*Rosenthal*: July) . . . 751*
- Morphologic evidence of vascular injury** as a possible mechanism of sudden death during infancy. (*Werne and Garrow*: July) . . . 730*
- Mouse**—Factors affecting the number of tumor metastases. Experiments with a transplantable . . . tumor. (*McCutcheon, Zeidman, and Coman*: July) . . . 673*
- Histochemical and microchemical study of . . . liver following a single feeding of carbon tetrachloride. (*Stowell, Lee, and Tsuboi*: July) . . . 687*
- Parenchymatous lesions of liver and kidney of mice due to pectin. (*Richter*: May) . . . 379
- Sarcomatoid growths resulting from mammary carcinoma cells that had sojourned in immune mice. (*Toolan and Kidd*: July) . . . 753*
- Skeletal growth and articular changes in mice receiving a high-fat diet. (*Silberberg and Silberberg*: January) . . . 113
- The effect of cortisone on the formation of granulation tissue in mice. (*Spain, Molomut, and Haber*: July) . . . 710*
- The pathology of folic acid antagonists in mice. (*Diamond and Farber*: July) . . . 671*
- Myeloma**—Amyloid and . . . (*Dahlin and Dockerty*: July) . . . 581
- Plasma cell tumors of the upper respiratory tract. A clinicopathologic study with emphasis on criteria for histologic diagnosis. (*Rawson, Eyles, and Horn*: May) . . . 445
- Nasal clefts**—The etiology of lateral . . . (*Stupka*: November) . . . 1085
- Neck**—Teratoma of the . . . in the region of the thyroid gland. A review of the literature and report of four cases. (*Bale*: July) . . . 565
- Necrosis**—Experimental total midzonal hepatic . . . (*Black-Schaffer, Johnson, and Gobbel*: May) . . . 397
- Hepatic . . . induced by dietary means. (*Abell and Bevedge*: July) . . . 713*
- Necrotizing pulmonary arteritis** occurring with congenital heart disease (Eisenmenger complex): report of case with necropsy. (*Old and Russell*: September) . . . 789
- Neoplasm**—See also under anatomical location concerned.
- Chemodectoma in the dog. (*Mulligan*: July) . . . 680*
- Factors affecting the number of tumor metastases. Experiments with a transplantable mouse tumor. (*McCutcheon, Zeidman, and Coman*: July) . . . 673*
- Pheochromocytomas and their relation to other chromaffin tumors. (*Wahl*: July) . . . 678*

- The association of lymphocytes with cancer cells undergoing distinctive necrobiosis in resistant and immune hosts. (*Kidd and Toolan*: July) 672*
- The effect of hepbisul (heptyl aldehyde-sodium bisulfite addition compound) and thyroxin on Walker rat carcinoma 256. (*Kraemer, Herbut, and Jackson*: July) 674*
- The morphologic and bioassay changes in Rous sarcoma associated with dietary or antagonist-induced folic acid deficiency. (*Woll, Dornbush, and Little*: July) 671*
- Nephropathy**—A distinctive vacuolar . . . associated with intestinal disease. (*Kulka, Pearson, and Robbins*: May) 349
- Nephrosis**—The effect of renal ischemia on the production of experimental . . . in jaundiced rabbits. (*Wartman, Rusterholz, and Tucker*: March) 235
- The effect of restriction of fluid intake on the production of . . . in rabbits. (*Wartman, Tucker, and Jennings*: May) 389
- Nerve**—A fibrous component of the . . . axon demonstrated in thin sections with the electron microscope. (*Geren*: July) 723*
- Neurilemmoblastosis**. The influence of intrinsic factors in disease when development of the body is abnormal. (*Inglis*: July) 521
- Neurofibromatosis**—Local gigantism (a manifestation of . . .): its relation to general gigantism and to acromegaly. Illustrating the influence of intrinsic factors in disease when development of the body is abnormal. (*Inglis*: November) 1059
- Neurofibromatosis in goldfish** resembling von Recklinghausen's disease in man. (*Schlumberger*: July) 679*
- New features of inclusion disease of infancy**. (*Worth and Howard*: January) 17
- Nuclear structure in mammary carcinoma**. (*Black and Speer*: September) 913
- Observations on arteriovenous communications ("hemangioma") in the lung**. (*Liebow, Kausel, Lindskog, and Jansen*: July) 730*
- Observations on the mitotic reaction induced by thiourea in the livers of rats**. (*Rachmilewitz, Rosin, and Doljanski*: September) 937
- Observations on the reduction of triphenyl tetrazolium chloride by normal and malignant human tissue**. (*Black, Opler, and Speer*: November) 1097
- Osteitis fibrosa cystica**—Metastasizing carcinoma of the parathyroid with . . . and extensive calcinosis. (*Ellis and Lee*: July) 742*
- Osteosarcoma induced by beryllium oxide**. (*Dutra and Largent*: March) 197
- Pancreas**—Carcinoma of the . . . A clinical and pathologic analysis of thirty-nine autopsied cases. (*Leach*: March) 333
- Changes in the pancreatic islets of Langerhans in Addison's disease. (*Hinerman*: July) 738*
- Chronic pancreatitis and lithiasis. II. Pathology and pathogenesis of pancreatic lithiasis. (*Edmondson, Bullock, and Mehl*: January) 37
- Glycogen infiltration (so-called "hydropic degeneration") of the . . . in experimental and human diabetes mellitus. (*Toreson*: July) 739*
- Lymphoid tissue and its relation to so-called normal lymphoid foci and to lymphomatosis. II. Quantitative analysis of lymphoid areas in the . . . of laboratory and farm chickens. (*Lucas and Oakberg*: January) 75
- The relationship of the . . . to the absorption of iron. (*Kinney, Finch, Kaufman, Hegsted, and Partington*: July) 746*
- Papillary cystadenoma lymphomatosum**—Histogenesis of . . . (Warthin's tumor) of the parotid salivary gland. (*Thompson and Bryant*: September) 807

- Parathyroid extract**—The demonstration of an effect of . . . on bone matrix. (*Carnes*: July) 736*
- Parathyroid gland**—Metastasizing carcinoma of the parathyroid with osteitis fibrosa cystica and extensive calcinosis. (*Ellis and Lee*: July) 742*
- The cell type of secondary parathyroid hyperplasia. (*Brines and Frits*: July) 737*
- Tumors of the parathyroid: a review of 23 cases with an evaluation of the pathologic criteria of carcinoma. (*Ackerman and Black*: July) 677*
- Parenchymatous lesions of liver and kidney of mice due to pectin.** (*Richier*: May) 379
- Parotid gland**—Histogenesis of papillary cystadenoma lymphomatosum (Warthin's tumor) of the parotid salivary gland. (*Thompson and Bryant*: September) 807
- Pathogenesis of amniotic fluid embolism.** (*Landing and Leary*: July) 734*
- Pathogenesis of experimental fat embolism.** (*Harman and Ragaz*: July) 551
- Pathologic changes induced in guinea-pigs by administration of diets deficient in the anti-stiffness factor.** (*Harris and Wulzen*: July) 595
- Pathology and etiology of salmon disease in the dog and fox.** (*Cordy and Gorham*: July) 617
- Pathology of fatal carbon tetrachloride poisoning.** With special reference to the histogenesis of the hepatic and renal lesions. (*Moon*: November) 1041
- Pathology of folic acid antagonists in mice.** (*Diamond and Farber*: July) 671*
- Pathology of the endocrine system in Albright's syndrome.** (*MacMahon*: July) 747*
- Pectin**—Parenchymatous lesions of liver and kidney of mice due to (*Richier*: May) 379
- Peliosis hepatis.** (*Zak*: January) I
- Periarteritis nodosa**—The effect of cortisone on the lesions of (*Baggenstoss, Shick, and Polley*: July) 709*
- Periarteritis nodosa of the appendix.** (*Platt*: July) 749*
- Periodic acid-Schiff's reagent technic**—Carbohydrate specificity of the periodic acid-Schiff's reagent (PAS) method. (*McManus*: July) 690*
- Pheochromocytomas** and their relation to other chromaffin tumors. (*Wahl*: July) 678*
- Phosphatase**—Histochemical studies on tissue enzymes. IV. Distribution of some enzyme systems which liberate phosphate at pH 9.2 as determined with various substrates and inhibitors; demonstration of three groups of enzymes. (*Newman, Feigin, Wolf, and Kabat*: March) 257
- Histochemical studies on tissue enzymes. V. A difficulty in enzyme localization in the acid range due to selective affinity of certain tissues for lead; its dependence on pH. (*Newman, Kabat, and Wolf*: May) 489
- Histochemical studies on tissue enzymes. VI. A difficulty in the histochemical localization of alkaline . . . in nuclei. (*Feigin, Wolf, and Kabat*: July) 647
- Phospholipids**—Serum . . . in experimental atherosclerosis. (*Kellner*: July) 732*
- Phosphorus**—The effect of the calcium and . . . content of the diet upon the formation and structure of bone. (*Cartlar, McLean, and Urist*: March) 307
- Plasma cell tumors of the upper respiratory tract.** A clinico-pathologic study with emphasis on criteria for histologic diagnosis. (*Rawson, Eyler, and Horn*: May) 445
- Plasmacytosis observed post mortem** in cases exhibiting hyperglobulinemia or signs of hypersensitivity. (*Robertson*: July) 750*
- Plasma protein**—The fate of transfused . . . , studied with plasma labeled with radioactive sulfur. (*Zeldis and Madden*: July) 726*

Pleura —Inflammatory pseudotumors of the (<i>Brown and Johnson: July</i>)	681*
Pleural mesothelioma. (<i>Campbell: May</i>)	473
Polioomyelitis —A histologic study of muscles and nerves in (<i>Densl and Neuburger: September</i>)	863
—Incidence of subclinical . . . in an urban area, according to age groups. (<i>Casey, Fishbein, Schabel, and Smith: July</i>)	741*
—Lymphoid lesions in (<i>Hartman, Sommers, and Wilson: July</i>)	667*
Polysaccharides —Combined histochemical staining of acid . . . and 1,2 glycol groupings in paraffin sections of rat tissues. (<i>Ritter and Oleson: July</i>)	639
Problem of depletion of the protein reserves. (<i>Cannon: July</i>)	712*
Proceedings —See American Association of Pathologists and Bacteriologists.	
Prolapse of redundant gastric mucosa through the pyloric canal into the duodenum. (<i>Manning and Gunter: January</i>)	57
Prostate —Infarction of the (<i>Mostofi and Morse: July</i>)	720*
Protein —The effect of sensitization and x-radiation on the metabolism of I ¹³¹ -labeled proteins. (<i>Dammin, Dixon, and Bukantz: July</i>)	691*
—The problem of depletion of the . . . reserves. (<i>Cannon: July</i>)	712*
Prothrombin —The relationship of coagulase-globulin to . . . as studied by the staphylocoagulase reaction. (<i>Miale: July</i>)	747*
Pulmonary arteriosclerosis. (<i>Laipply and Fisher: July</i>)	731*
Pulmonary artery —Studies on the lung after ligation of the . . . II. Anatomical changes. (<i>Liebow, Hales, Bloomer, Harrison, and Lindskog: March</i>)	177
Pyridoxine deficiency —Studies of the pathogenesis of human arteriosclerosis and experimental arteriosclerosis in the pyridoxine-deficient monkey. (<i>Rinehart and Greenberg: July</i>)	689*
Rabbit —Diffuse glomerulonephritis induced in rabbits by repeated small intravenous injections of whole horse serum. (<i>McLean, Fitzgerald, Younghusband, and Hamilton: July</i>)	694*
—Lesions of the heart in rabbits intravenously injected with serums from cases of rheumatic fever. (<i>Schultz and Fite: July</i>)	706*
—The effect of renal ischemia on the production of experimental nephrosis in jaundiced rabbits. (<i>Wartman, Rusterholz, and Tucker: March</i>)	235
—The effect of restriction of fluid intake on the production of nephrosis in rabbits. (<i>Wartman, Tucker, and Jennings: May</i>)	389
—The reaction of reticulo-endothelial cells of rabbits to total body x-radiation. (<i>Barrow, Tullis, and Chambers: July</i>)	686*
Rat —Adrenal cortical activity in relation to lymphoid tissue and to immune bodies. (<i>Stoerk and Solotorovsky: July</i>)	708*
—A study of the ageing of collagenous connective tissue of . . . skin with the electron microscope. (<i>Gross: July</i>)	708*
—Combined histochemical staining of acid polysaccharides and 1,2 glycol groupings in paraffin sections of . . . tissues. (<i>Ritter and Oleson: July</i>)	639
—Hypertension in rats following complete renal ischemia. (<i>Koletsky: July</i>)	695*
—Observations on the mitotic reaction induced by thiourea in the livers of rats. (<i>Rachmilewitz, Rosin, and Doljanski: September</i>)	937
—The effect of sodium sulfadiazine on the renal tubule (nephron) of the albino (<i>Brunson and Edwards: September</i>)	923
—The importance of methionine and choline in the arrest of dietary cirrhosis of the liver in the (<i>Jaffé, Wissler, and Benditt: September</i>)	951
Reactions of reticulo-endothelial cells of rabbits to total body x-radiation. (<i>Barrow, Tullis, and Chambers: July</i>)	686*

- X-radiation**—The effect of sensitization and . . . on the metabolism of I^{131} -labeled proteins. (*Dammin, Dixon, and Bukantz*: July) 691*

INDEX OF AUTHORS

Abell, M. R., and Beveridge, J. M. R. Hepatic necrosis induced by dietary means. (July)	713*
Ackerman, L. V., and Black, B. Tumors of the parathyroid: a review of 23 cases with an evaluation of the pathologic criteria of carcinoma. (July)	677*
Aegerter, E., and Long, J. A summary for the defense of the altered immunity mechanism in the collagen diseases. (July)	702*
Altschuler, C. H., and Angevine, D. M. Reactive abnormalities in connective tissue of the lung. (July)	683*
Anderson, R. B., and Gunn, F. D. A comparison of cutaneous and pulmonary lesions in experimental silicosis. (July)	735*
Angevine, D. M. See Altschuler and Angevine (July)	683*
—, and Seastone, C. V. Local cellular responses in experimental hypersensitivity. (November)	1011
Axelrod, A. R. See Berman, Axelrod, Goodman, and McClaughry (July)	740*
Baggenstoss, A. H., Shick, R. M., and Polley, H. F. The effect of cortisone on the lesions of periarteritis nodosa. (July)	709*
Baker, R. D. The general pathology of the dermatomycoses. (July)	719*
Bale, G. F. Teratoma of the neck in the region of the thyroid gland. A review of the literature and report of four cases. (July)	565
Barnes, S. See Terplan and Barnes (July)	722*
Barrow, J., Tullis, J. L., and Chambers, F. W. The reaction of reticulo-endothelial cells of rabbits to total body x-radiation. (July)	686*
Beckett, R. S., Netsky, M. G., and Zimmerman, H. M. Developmental stenosis of the aqueduct of Sylvius. (September)	755
Benditt, E. P. See Jaffé, Wissler, and Benditt (September)	951
Berman, L., Axelrod, A. R., Goodman, H. L., and McClaughry, R. I. The "lupus erythematosus phenomena" of blood and bone marrow. Morphologic and serologic observations. (July)	740*
Beveridge, J. M. R. See Abell and Beveridge (July)	713*
Black, B. See Ackerman and Black (July)	677*
Black, M. M., Opler, S. R., and Speer, F. D. Observations on the reduction of triphenyl tetrazolium chloride by normal and malignant human tissue. (November)	1097
—, and Speer, F. D. Nuclear structure in mammary carcinoma. (September)	913
—, —, and Opler, S. R. Visualization of dehydrogenase activity in tissues. (July)	741*
Black-Schaffer, B., Johnson, D. S., and Gobbel, W. G., Jr. Experimental total midzonal hepatic necrosis. (May)	397
—, and Silverman, S. B. Acute non-streptococcal glomerulonephritis—experimental demonstration of a pathogenesis. (July)	696*
Bloomer, W. E. See Liebow, Hales, Bloomer, Harrison, and Lindskog (March)	177
Blumenthal, H. T., Lansing, A. I., and Gray, S. H. The interrelation of elastic tissue and calcium in the genesis of arteriosclerosis. (November)	989
Blunt, J. W. See Plotz, Howes, Meyer, Blunt, Lattes, and Ragan (July)	709*
Bostick, W. L. The effect of Hodgkin's disease extracts on fertile chicken eggs. (July)	675*
Brines, O. A., and Fritz, G. E. The cell type of secondary parathyroid hyperplasia. (July)	737*
Brown, J. H. U. See Gross and Brown (July)	724*
Brown, W. J., Jr., and Johnson, L. C. Inflammatory pseudotumors of the pleura. (July)	681*

* Abstract of paper presented at the meeting of The American Association of Pathologists and Bacteriologists held at Madison, April 13, 14, and 15, 1950.
